SUMMARY

Junior software developer with a strong foundation in frontend development and hands-on experience building structured, project-based applications.

I have contributed to team-based systems and a startup MVP, and I am currently focused on developing my backend engineering and system design skills through practical implementation.

EXPERIENCE

Frontend developer – Nomad54 Startup

Remote | Volunteer | May 2025 – July 2025

- Contributed to building core marketplace features that enabled supplier and product workflows.
- Implemented UI components and resolved issues to improve usability and feature reliability.
- Worked in a fast-paced environment, adapting quickly to changing product requirements

Technical Student Support – ALX Africa

Volunteer | May 2024 – June 2024

- Supported users with platform access issues, account problems, and system navigation.
- Applied structured problem-solving to resolve common technical issues efficiently.

PROJECTS

Blog CMS System (In Progress) | [GitHub](#)

- Designing a backend system using modular monolith architecture.
- Building REST APIs with FastAPI, including CRUD operations and validation.
- Applied structured problem-solving to resolve common technical issues efficiently

Career Recommendation Web App | [GitHub](#)

- Contributed to a system generating career recommendations based on user data.
- Structured datasets and designed surveys to improve recommendation relevance.
- Supported personality-based recommendation logic (DISC model).

Product Page (Frontend Application) | [Live](#) | [GitHub](#)

- Built a React application with product filtering, search, and API integration.
- Managed state using hooks and implemented multi-criteria filtering logic.
- Structured reusable components for clarity and maintainability.

EDUCATION

Bachelor of Science in Information Technology | 2022-2024

Richfield Graduate Institute of Technology | Systems development | GPA: 3.4

SKILLS

- **Frontend:** HTML, CSS (Flexbox, Grid), JavaScript
- **Application Development:** React, State Management with hooks, API integration
- **Backend (learning):** FastAPI, SQLAlchemy, data modelling, request validation
- **Soft Skills:** Problem-solving, debugging, communication, teamwork, adaptability
